WORK EXPERIENCE:

Affirma Consulting, LLC

November 2021 - Present

Worked together with a team to build a semantic productivity application for Microsoft Office products such as Outlook and Excel.

- Analyzed and amended the predictions for a semantic based model in a machine learning environment.
- Used tools such as GitHub and VS Code to collaborate with other team members in maintaining a healthy and productive repository.

AFI Technology

January 2020 - November 2021

Worked as a web developer to build and maintain a dynamic business orientated website using the React framework.

- Still work to maintain and keep site running.
- Main designer and responsible for code base.

United Parcel Service

January 2020 - November 2021

Worked together with a large team in order to service the Southern California area with packages and supplies.

- Lead a team of individuals in a high paced, high-energy environment.
- Used metrics to track and help provide my team with more efficient ways of productivity.

Tec Equipment - Truck and Trailer

January 2014 - January 2020

Maintained and managed a \$500,000 inventory by implementing new procedures and dispatching warehouse runners. Daily activities included front counter part sales and all shipping duties required to maintain a healthy inventory.

- Worked together with a team to supply and repair commercial sized transportation equipment.
- Helped customers daily with a wide range of issues.
